Classroom Practice: Symfony Forms

Classroom Practice: Making API in Symfony

Classroom Practice: Symfony Forms

- Creating a form for your entity
- Adding stuff to your Form
- Working in Controllers
- Sending the form to the template
- Including/showing the form in your template
- Start of validation
- Submission handling

<https://u16p.com/qegy9nx3l5>

*Watch video marked **Step 1 - Step 4** and try to replicate to create a simple Symfony Form*

<https://symfony.com/doc/current/forms.html>

Classroom Practice: Make Symfony API

- Follow the blog post written here:
<https://unelma.io/vdCnI>
- Use Symfony-MAMP setup for databases and .env settings
- Make Symfony API
- Test API using PostMan
